

Behind every well-run operation is a well-run storeroom. At EECO, we've spent years, sweat and tears optimizing every aspect of industrial electrical storerooms. Whether you're just starting a storeroom management program, or want to improve the effectiveness of an existing operation, a free on-site assessment and optimization plan is the first step to a more efficient and effective electrical storeroom.

## 1. Get organized

We clean and organize your storeroom for easy access to the right SKU at the right time

- Space optimization and shelving layout
- Part identification and data cleansing
- SKU reduction and standardization
- Bins and barcode labeling
- Informative signage and conversion charts

## 2. Manage Storeroom Inventory

Increase efficiency by optimizing your procurement and MRO processes

- Vendor Managed Inventory (VMI) end-to-end solution
- Total Cost of Ownership (TCO)
- Staff and assistance

## 3. Inventory Control and Reporting

Exercise greater control with full visibility into your inventory

- Internet-based real-time inventory software system
- Single or multisite solutions
- Barcode scanners
- Customized reporting capabilities
- Integration with your current ERP system
- Real-time pricing

## 4. Product Migration and Electronic Board Repair

Gain peace-of-mind with repairs, migrations and upgrades

- Installed Base Evaluations (IBE)
- Remanufacturing service with up to a 24-month warranty  
Visit: [eeconline.com/automation/ers](http://eeconline.com/automation/ers)
- Parts Management Agreements (PMAs)
- Part-for-part conversion
- Order-time reduction

Put our deep experience to work for you and let us help maximize the efficiency of your operation. Take 2 minutes to request your on-site assessment. It may be the first 2 minutes of a long and valuable partnership based on greater efficiency.
