

Siemens Connectivity to EtherNet/IP Networks - PowerPlay USA Workshop

May 16 REGISTER ONLINE

May 17 REGISTER ONLINE

8:30 A.M. - 1:30 P.M.

This hands-on training will demonstrate how seamless it is to use Siemens automation products on both EtherNet/IP and PROFINET applications.

The first part consists of a Siemens Automation product line presentation overview. The second part is a hands-on lab where you will experience our flexible solutions for both protocols. You will commission SINAMICS G120 drives using STARTER and control them using both our SIMATIC S7-1500 and Rockwell CompactLogix controllers. All products will be connected through our SCALANCE XR-300 switch and remotely operated via our Comfort Panel Touch HMI.

2 Opportunities

May 16 EECO Charleston Branch - 7269 Cross Park Drive, Charleston, SC 29418

May 17 EECO Columbia Branch - 175 Lott Court, Columbia, SC 29169
