

Industrial Automation and Power Solutions

Since 1926, **EECO** services the manufacturing plants, machine builders, and construction teams that make our communities strong. With 2 locations across South Carolina, we are redefining the expectations of a distributor by placing people and ideas before products.

Our commitment is to develop innovative processes, practices, and services that improve our customers' operations while providing the highest-quality products when and where you need it.

EECO is a full line electrical distributor that specializes in Industrial Automation and Power Solutions to reduce costs, increase reliability, and improve performance.

SIEMENS

A global powerhouse focusing on the areas of electrification, automation and digitalization.

Solutions and Services

Delivering certified services for end-of-life upgrades, optimizations, and future projects.

- Pre-sales support for Automation products
- Power Monitoring Solutions
- Proof of Concept with smart devices in one of our connected power labs

- Safety Assessments
- Physical and logical network assessments
- Variable Frequency Drive start up
- Arc Flash Coordination Studies
- Installed Base Evaluations (IBE)

- Migration of Rockwell-base machines and components to Siemens
- Vendor Managed Inventory programs
- Critical Spare Evaluation
- Lockout tagout studies

Don't see your preferred brand?

EECO supplies countless vendors, but prefers to list the brands we strongly dedicate inventory to. Ask your local branch about any brand you don't see listed. Chances are, it could already be in stock.
